Education

Bachelor of Engineering, Software Engineering

5/2025

Concordia University - Montreal, QC.

Courses: Data Structures & Algorithms, Operating System, Java OOP, Software Process.

Experience

Genetec, Inc. - Montreal, QC

5/2023 - Now

Software Developer Intern

Full-stack development in a large microservice codebase for the industrial IoT team (C#, .Net).

- Developed a feature that searches for Modbus devices connected to a certain range of IP addresses and Ports, retrieves them, and makes them available for the user, dividing by 10 the number of steps required to add a device.
- Added two plugin factories: one for XML string integration and another for regex-based character substitution, expanding software capabilities and compatibility.
- Collaborated with the team to optimize the plugin's responsiveness, resulting in significant improvements to data serialization and a 60% reduction in device polling intervals.

iBwave Solutions Inc. - Montreal, QC

09/2022 - 12/2022

Software Developer Intern

Full-stack development on their Web Platform team following Scrum methodology with Azure DevOps and Jira.

- **Doubled** software security by repairing critical security issue by creating **front-end** and **back-end** verifications (Angular, Typescript, C#).
- Increased code coverage by writing comprehensive unit, integration, and automated tests, employing tools like Selenium and SQL.
- Introduced a search bar and API call methods to filter, send and verify the content of project properties.

Projects

JobQuest – GitHub

01/2023 - 04/2023

- Led team of 7 members overseeing sprint planning, task delegation, and providing support in debugging code and implementing features, ending up with an average mark of **98%** for the project.
- Implemented CRUD operations and a robust login system using Next.JS, Express, Node.JS and MongoDB.
- Designed the website layout, form pages, and login/signup pages, focusing on delivering a seamless user experience, and deployed the project on **Vercel**.

CoursesDB – GitHub 03/2023 – Now

- By focusing on security and password encryption, decreased the risk of identity theft by 50%.
- Established role-specific permission, enabling administrators to create new courses, while granting users the
 ability to provide comments, facilitating efficient content management and ensuring an optimized system workflow.
- Enabled server-side rendering, therefore improving the speed of loading times by 65%.

Extracurricular

UpStart – Devpost

02/2023

Created the mockup of a startup where industrial-organizational psychologists would be contracted to help integrate a great work environment in Montreal's companies. Design made with Figma.

Skills

Programming: JavaScript/TypeScript, Python, Java, C#, C++, C, SQL, MongoDB, REST APIs, PHP **Other:** Next.js, ReactJS, Angular, .NET, Selenium, Tailwind, Node.js, Express, Computer Network **Interest:** Board Games, Fantasy/Sci-fi, Travel, Alpine ski, Space
